In the article by van de Hoef et al, “Diagnostic Accuracy of Combined Intracoronary Pressure and Flow Velocity Information During Baseline Conditions: Adenosine-Free Assessment of Functional Coronary Lesion Severity,” which published online July 10, 2012, and appeared in the August 2012 issue of the journal (Circ Cardiovasc Interv. 2012;5:508–514), a correction was needed.

The authors discovered an inadvertent error in the baseline patient characteristics described in Table 2 and the corresponding text.

The final version of Table 2 and the corresponding text have been corrected in the online version of the article.

The authors regret this error.
Correction
